COMMISSION MEETINGS

1971 - FEBRUARY, 1977

SUSQUEHANNA RIVER BASIN COMMISSION

MAY 12, 1977

The Susquehanna River Basin Commission was created as an independent agency by a Federal-Interstate Compact\* among the States of Maryland, New York, Commonwealth of Pennsylvania and the Federal Government. In creating the Commission, the Congress and State Legislatures formally recognized the water resources of the Susquehanna River basin as a regional asset vested with local, State and National interests for which all the parties share responsibility. As the single Federal-Interstate water resources agency with basinwide authority, the Commission's goal is to effect coordinated planning, conservation, management, utilization, development and control of basin water resources among the government and private sectors.

## PREFACE

This Index has been prepared to provide a reference document on the business record of Commission meetings.

Subject areas are listed alphabetically in the Table of Contents and appear similarly in the body of the Index. The Minutes of a Commission meeting during which a subject was discussed are identified along with the page number on which the item appears within those Minutes. Appropriate exhibits, resolutions and Commission publications are also listed. Certain programs and projects are indexed also by their respective signatory State.

It is envisaged that this Index will be updated annually. Since, however, this document is intended to be very functional and in a developmental stage, comments and suggestions for improvements are encouraged.
